

road safety packages — K to grade 7

Our learning resources have been developed to ensure that B.C. students obtain road safety skills and awareness. These materials support prescribed learning outcomes as established by the B.C. Ministry of Education for students in Kindergarten through grade 10. They are also FREE for all B.C. schools.

They're never too young to learn road safety

Traffic safety is an important issue for more than just teenagers and young adults. Pedestrian, bicycle and passenger safety are all examples of topics that children need to learn about. ICBC's RoadSense Kids resources support cross-curriculum learning from a variety of subject areas.

K to Grade 3 RoadSense Kids: Activities for learning road safety

Students complete a variety of road safety activities related to staying safe as passengers, pedestrians and cyclists. They will develop their very own road safety album that can be shared with other students and their family.

This new learning resource package includes:

- Child passenger safety and booster seat content.
- Innovative learning plans and stimulating road safety activities.
- Walk 'n' ride rhythms CD — Will Stroet performs fun and inspiring road safety songs about booster seats, pedestrian and bike safety.
- Walk smart, Bike safe DVD and teaching notes.

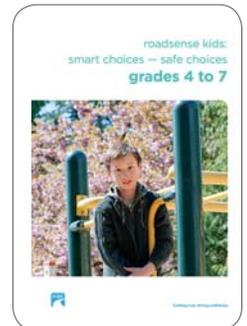

Coming September 2013 — ICBC SMART Board road safety curriculum will be available for Kindergarten – Grade 1 and grades 4 to 7! Deliver dynamic and interactive road safety lessons through SMART Board interactive white board technology.

Grades 4 to 7 RoadSense Kids: Smart choices — Safe choices

Road safety lessons support cross-curricular learning outcomes including real-world practice of leadership, peer support and strategies for dealing with peer pressure.

This new learning resource package includes:

- Innovative learning applications to walking, biking, distractions and other road safety concerns.
- Fresh approaches to effectively assess and evaluate student learning.
- Walk smart, Bike safe DVD and teaching notes.

K to Grade 7 Walk smart, Bike safe DVD

Join hosts Dante and Tiara as they lead the group through the dos and don'ts of pedestrian and bike safety on city and country roads.

The video segments are organized according to age group and skill level. The DVD includes teaching notes.

Grades 1 to 7 Bike smarts for children

An instructor's handbook to help children seven to 13 learn safe-cycling skills.

road safety packages — grades 8 to 10

Our learning resources, developed to ensure that B.C. students obtain road safety skills and awareness, support prescribed learning outcomes as established by the B.C. Ministry of Education for students in Kindergarten through grade 10.

One-in-five new drivers will be involved in a crash within the first two years of driving. Research shows that injury and death can be prevented if young people adopt self-protective practices. We want to keep youth safe, but can't work alone — we need support from communities, parents, and schools.

Our road safety packages for grades 8 to 10, designed with flexibility and ease-of-use in mind, include activities that relate awareness of road safety to larger issues such as personal and social responsibility, risk assessment, or decision-making. Lessons help teens understand the risks and responsibilities associated with being a passenger or getting a driver's licence.

Grade 8 (Health & Career Education)

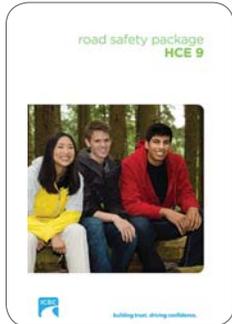

Students assess the potential risks associated with a variety of road-related situations. Topics include issues such as personal and social responsibility and decision-making.

Using case studies, scenarios and a school walkabout, students explore the hazards and risks and their role in road safety. Students use reflection as well as self

and peer assessment to further consider their personal impact of road safety.

Includes the DVD: *A crash course in common sense.*

Grade 9 (Health & Career Education)

Students develop and propose strategies to avoid unnecessary risks on the road and in the community.

Through the use of collaborative learning and group discussion techniques, students examine issues relating to road safety and responsibility. Using guided reflection, students consider road-related risk as well as their

personal and social impact.

Includes the DVD: *Street level.*

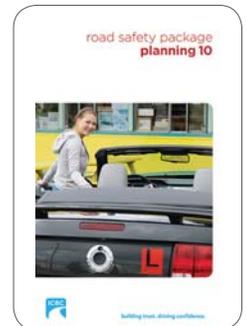

Grade 10 (Planning)

Students analyze individual and societal practices associated with road-related risk reduction and injury prevention (e.g., obeying speed limits, wearing seatbelts, and driver education).

With its strong focus on matters of immediate personal interest to students, Planning 10 provides a natural context for students to reflect on what's involved in safely driving a vehicle.

Driving is an important priority for many young people, since a driver's licence represents an extension of personal mobility and independence.

Includes the videos: *Final marks* and *Your life, Your choice.*

Other ICBC road safety educational resources

Your Ad Here

Car crashes are the number one preventable cause of death for youth aged 12 to 21 in B.C. For the past three years, we asked students in grades 8 to 12 to create a road safety ad about the causes of these crashes (impaired driving, distracted driving, and speeding) to help their friends learn to drive smart. Thanks to the great participation of high school across B.C. we received more than 500 entries in total.

Check out the winners and all of the amazing entries at www.icbc.com/youradhere.

Road Safety Speakers

Our Road Safety Speakers tell personal, heart-wrenching stories about wrong choices made when driving. Their messages are powerful and motivate teens to think twice about taking big risks on the road.

Thirteen Road Safety Speakers are available in B.C. between March and June. Presentations are for an assembly-style audience for grades 11 and 12; however, you can include younger students.

Check out our Road Safety Speakers Program webpage to see their profiles and book a speaker: www.icbc.com.
